### Proceedings:

Even though it is the scope of the Wind Energy Generating Company, in order to evacuate wind energy generated from the Wind Energy Generators, the Board has created evacuation infrastructure such as Establishment of Sub-Station / Erection of addl. Power Transformers on collection of IDC charges from the Wind Mill Generators. To speed up the power evacuation work, the same has been entrusted to some of the Wind Energy Developers under a joint basis.

Since, the companies have not completed the power evacuation works for a longer period, the works which were entrusted were cancelled. But the cancelled companies and new companies are representing to reconsider the power evacuation works.

In this regard a meeting was conducted with Indian Wind Turbine Manufactures Association on 19.12.2009 and 20.1.2010. In which, it was decided that for every location of Sub-Station request application fee has to be collected. On collection of application fee after registering the application, the same may be intimated to Planning Wind for System Studies.

After careful consideration Tamil Nadu Electricity Board approves the following proposals:

1. For every location of request of power evacuation works such as establishment of Sub-Station/Power Transformer a non refundable power evacuation application registration fee of Rs.5 Lakhs has to be collected from the Wind Energy Developer.

2. The power evacuation application will be registered at the office of the CE/NCES only on payment of application fee of Rs.5 Lakhs per location.

3. The Power evacuation application will be valid only on the load flow study result is feasible.

4. If the load flow study is not feasible of compliance, such power evacuation application is liable to be cancelled and a fresh application has to be submitted for new request on payment of applicable fee.
