### REPORT TO ACCOMPANY THE ESTIMATE

This proposal envisages for enhancement of 400/230 kV Inter Connecting Transformer (ICT) capacity from 2x315 MVA to 3x315 MVA at KR Thoppur 400/230-110 kV Substation in Salem operation circle of Erode Region at an estimated cost of Rs.3117.86 Lakhs (Gross) and Rs.3054.70 Lakhs (Nett).

#### 2.Need:

2.1 The existing 400kV/230-110kV Substation at K.R.Thoppur is fed from M/s. Power Grid Corporation of India Ltd., Substation through 400 kV Bus Section-I & II. K.R.Thoppur 400/230-110 kV Substation was commissioned during the year 1988 and now it has 2x315 MVA, 400/230KV ICTs and 2x200 MVA 400/110kV ICTs. Further, administrative approval has been accorded for enhancement of 400/110 kV ICT capacity from 2x200 MVA to 3x200 MVA vide (Per) CH. TANTRANSCO Proceedings No.70, Dated 29.04.2013.

2.2 The 400/230 kV ICT-I is of composite unit; whereas the 400/230 kV ICT-II has three single phase units of each 105 MVA capacity (3x105 MVA). One no. spare unit (1x105 MVA) is available for the 400/230 KV ICT-II. The above 2 Nos. 400/230 kV ICTs are feeding 10 Nos. 230 kV feeders.

2.3 The peak reached in the 400/230 kV ICTs at K.R.Thoppur SS are as follows.

315 MVA, 400/230 kV ICT – 1 - 311.03 MVA

315 MVA, 400/230 kV ICT - 2 - 307.23 MVA

It is evident that both the 315 MVA auto transformers have reached upto full load and continues to be handling more than 85% of its full load

capacity from the year 2016. Further, three nos. of 230/110 kV substations viz., Pallakkapalayam, Thingalur and Singapuram were commissioned during the period 2014-2016. The above 3 nos. substations are fed from K.R.Thoppur 400/230-110 kV SS which ultimately raise the power flow loading of existing ICTs. Moreover, administrative approval has also been accorded for the establishment of new 230 kV SSs at Karuppur and Erode which are to be fed either directly or indirectly from K.R.Thoppur 400 KV SS. The erection work for a new 230 KV SS at Erode is also under progress.

- 2.4 The 2x315 MVA, 400/230 kV ICTs reach their full load capacity during the following conditions.
- (i) When generation at MTPS is reduced
  - (ii) When the Pugalur – Puthanchandai 230 kV feeder tie is opened
  - (iii) When the Deviakurichi – STCMS 230 kV feeder tie is opened
  - (iv) When KR Thoppur – MTPS-I & II 230 kV feeders are under line clear and
  - (v) When there is an outage (forced/planned) in the MTPS (Stage-II) – Thiruvalem 400KV feeder.
- 2.5 In the Load flow study report for the establishment of Karuppur 230/110kV SS, it has been suggested to enhance the capacity of 400/230-110 kV SS for operational flexibility and reliability purpose.
- 2.6 Due to enhancement of 400/230kV ICT capacity from 2x315 MVA to 3x315 MVA at K.R.Thoppur 400/230-110 kV SS, the existing 230KV Bus I & II with Twin Moose conductor at 230 KV side will be loaded more than existing current carrying capacity. Hence, the existing 230kV strung bus at K.R.Thoppur 400/230-110 kV SS need to be strengthened from the existing Twin Moose conductor to Quad Moose conductor.
- 2.7 Under the above circumstances, in order to increase the operational flexibility, to cater the loads and manage future load growth, it has been proposed to enhance the 400/230 kV ICT capacity. Sufficient space for erection of additional one number 400/230kV, 315 MVA ICT is made available now.
- 2.8 In order to ensure the necessity for the proposed ICT enhancement at K.R.Thoppur 400/230-110kV substation, load flow study has been carried out for the present year (2021-2022) network condition. From the study results, it is inferred that the existing 2x315 MVA, 400/230kV ICTs are found to be loaded up to 222 MW & 205 MW in each ICT during Nil wind and full wing conditions respectively. Hence, to meet out the N-1 contingency condition as well as the maintenance of ICTs, it is very much essential to enhance the 400/230 kV ICT capacity from 2x315 MVA to 3x315 MVA at K.R.Thoppur 400/230-110kV SS.
- 2.9 In the 41<sup>st</sup> Standing Committee Meeting for Power system planning conducted by CEA, it has been approved for the enhancement of 400/230 kV ICT capacity from 2x315 MVA to 2x500 MVA ICT at K.R.Thoppur 400/230-110kV SS. However, in the 2<sup>nd</sup> SRPC (Transmission Planning) meeting, it has been suggested to provide additional 315 MVA so as to enhance 400/230 kV ICT capacity from 2x315 MVA to 3x315 MVA instead of 2x500 MVA ICT in order to meet out the (n-1) condition and also to increase the operational flexibility. Hence it has been proposed to enhance the 400/230 kV ICT capacity from 2x315 MVA to 3x315 MVA with pending CEA approval.

### 3. Details of work:

1. Erection of 1 No.315 MVA, 400/230 kV Inter Connecting Transformer with associated switchgear and auxiliaries.

2. Strengthening of 230kV strung bus from Twin Moose to Quadruple Moose Conductor to accommodate one no. additional 315 MVA, 400/230kV ICT.
3. Laying of 3 runs of 400 KV, 1Cx2500 sq.mm. XLPE Copper cable for a route length of 160 Mtrs. for extending 400 KV supply to the proposed 315 MVA, 400/230 KV ICT by crossing the main approach road of the substation.
4. Dismantling the existing twin Moose conductor of 230 KV Strung bus along with insulators and fittings.

#### 4. Estimated cost:

- 4.1 The estimated cost works out to Rs.3117.86 Lakhs (Gross) and Rs.3054.70 Lakhs (Nett) and the estimate is based on the TANTRANSCO cost data for the year 2020-2021. The rate for 400 KV 1x2500 sq.mm XLPE Copper cable and terminations are based on the rates sanctioned for Establishment of 400/230 KV GIS at Koyambedu vide (Per) FB TANTRANSCO Proceedings No.7, (TB) Dated 04.02.2020.
